JEFFREY FREDMAN
PRIMARY EXAMINER

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 16, 2006 has been entered.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to either a nucleic acid which encodes the complete polypeptide of SEQ ID NO: 97, or to a nucleic acid which must comprise SEQ ID NO: 96, (or to antisense DNAs or probes which must comprise SEQ ID NO: 96). This protein, termed Clan-A in the specification and CARD-12 in the post filing art, was predicted to induce caspase activity, which is a regulator of interleukin 1B activity. Applicant identifies these activities as a basis for utility. Upon reconsideration, the utility argued by Applicant is more likely than not true and therefore meets the requirements for 35 U.S.C. 101 and 112, enablement. The sequence is novel and unobvious over the prior art. Therefore, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
